

New York State Reliability Council - Reliability Rules Subcommittee

List of Potential Reliability Rule Changes - Outstanding

Categories: R = Rule; D = Definition; M = Measurement; P == Procedure/Guideline; C = Compliance Elements; E = Exception
 Status: 1=In RRS for development/review 2=In RCMS for compliance elements 3=To EC for approval to post 4=Approved by EC for posting
 5=RRS incorporating comments from posting 6=To EC for final approval 7=Approved by EC 8=Removed

PRR No.	Existing Rule	Potential Rule Change	Sponsor	Category	Status	RRS Action
8	New	Reactive load and resource PF requirements at BPS/LSE boundary	R. Waldele	R	1	Prepare template after operating reactive study is completed
52	New	Generator Governor Response	R. Waldele	R/M	1	Monitor progress of NPCC-SS38 investigation of governor response & UFLS program
84 (5/30/06)	F-R8 & F-M3: Operation During Major Emergencies	Modification-adding details about generator under frequency operation.	Pappas	R/M	1	PRR is being revised. On hold pending final approval of NPCC A-3
85 (5/11/06)	D-R2: Minimum Operating Reserve Requirements	Modification	Pappas	R	4	On 5/5/06 sent to RCMS for compliance elements. On 6/1/06 the PRR was approved to send to EC for approval to post. EC approved to post on 6/9/06. Comments due 7/31/06. No comments were received. On 8/3/06, agreed to send to EC for final approval.
86 (5/26/06)	B-R2: Voltage Assesment, B-R3: Stability Assesment	Modification-making consistent with NPCC A-2 by deleting requirements related to Emergency Transfer Capapility in Transmission Planning	Waldele	R/M	1	PRR is under review by RRS.
87 (5/31/06)	New	Wind generator clearances from transmission lines	Crandall	R/M	1	A PRR is being drafted/revised to address wind generators in the vicinity of transmission lines (fall zone issue)
