**Subject:** 100% Carbon Neutral Electricity by 2040  
**Date:** January 16, 2019 at 10:48 AM  
**To:** Clayton Roger roger.clayton@electricpowerresources.com, Herb herb@poweradvisorsllc.com

Roger/Herb,

I think the following article should be shared with the EC. Governor Cuomo is calling for a 100% “carbon neutral” electric sector by 2040, including ramping up the 50% renewables goal to 70% renewables by 2030. <https://www.greentechmedia.com/articles/read/new-york-cuomo-green-new-deal-clean-energy#gs.pyTqdFhn>. Here are some of the prongs:

- Nearly quadrupling New York’s offshore wind target to 9,000 megawatts by 2035, up from 2,400 megawatts by 2030
- Doubling distributed solar deployment to 6,000 megawatts by 2025, up from 3,000 megawatts by 2023
- More than doubling new large-scale, land-based wind and solar resources through the Clean Energy Standard
- Maximizing the contributions and potential of New York's existing renewable resources
- Deploying 3,000 megawatts of energy storage by 2030

Regards,

**Matthew Schwall | Director of Market Policy & Regulatory Affairs**
