

| List of Potential Reliability Rule Changes - Outstanding | | | | | | |
|--|--|--|----------------|-----------------|---------------|-------------------|
| Categories: R = Rule; D = Definition; RO = Requirement; P = Procedure/Guideline; C = Compliance Elements; E = Exception | | | | | | |
| Status: 1=In RRS for development/review 2=In RCMS for compliance elements 3=To EC for approval to post 4=Approved by EC for posting 5=RRS incorporating comments from posting 6=To EC for final approval 7=Approved by EC 8=Removed | | | | | | |
| PRR No. | Existing Rule | Potential Rule Change | Sponsor | Category | Status | RRS Action |
| PRR 150 | New Rule: Resource Adequacy Requirements for Mitigating the Threats of Extreme Weather | R1. NYISO Extreme Weather Resilience Operating Plan. R2. Operation During Impending Severe Weather. R3. NYCA Long Term Extreme Weather Resource Adequacy Assessments. | RRS | R | 1 | In development |
| PRR 151 | New Rule: NYCA Interconnection Standards for Large Facility Inverter Based Resources | R1. NYISO shall prepare and maintain procedures based on Sections 1 - 4 of IEEE 2800-2022. R2. NYISO shall perform interconnection studies based on Sections 5, 6, 7 & 9 of IEEE 2800-2022. R3. NYISO shall prepare and maintain procedures based on Sections 10, 11 & 12 of IEEE 2800-2022. R4. NYISO shall prepare a technical report documenting compliance with requirements R1, R2 & R3. | RRS | R | 1 | In development |
