Jim,

I agree, the 345/230 kV transformers the NYISO will be the TOP for and the 345/115kV and 230/115kV National Grid will be the TOP for. Going forward the TOP registration will define the responsibilities.  
Aaron

NG is requesting removal of exception #4. Please provide any comments to me, as NYSRC will require NYISO input into whether or not to grant this request. Thanks.

4	NG	Monitoring	<u>Monitoring of Transmission Transformer</u> National Grid is fully responsible for monitoring all National Grid 345/115 kV, 345/230 kV, and 230/115 kV transformer overloads and contingency overloads. The NYISO notifies National Grid of any overloads and contingency overloads it detects, but does not invoke these limits unless requested to do so by National Grid. <i>Approved NYPP Operating Committee October 25, 1979.</i>
