# Winter 2016 Ambient Conditions

 Winter 2016
Milder than past two winters
Milder than 10year & 30-year averages

Month

Decembe

January

February

(Heating Degree Day - The higher the HDD, the colder the average temperatures)

1	Time Period	6 PM Min Temperature	Heating Degree Days (55 F)
er.	30 Yr	20.1	628.7
	10 Yr	23.9	573.8
	2015	33.7	275.8
	30 Yr	14.0	793.4
	10 Yr	13.6	800.6
	2016	15.9	732.7
	30 Yr	17.3	<b>695.0</b>
	10 Yr	17.0	721.1
ر س س	2016	6.3	614.9

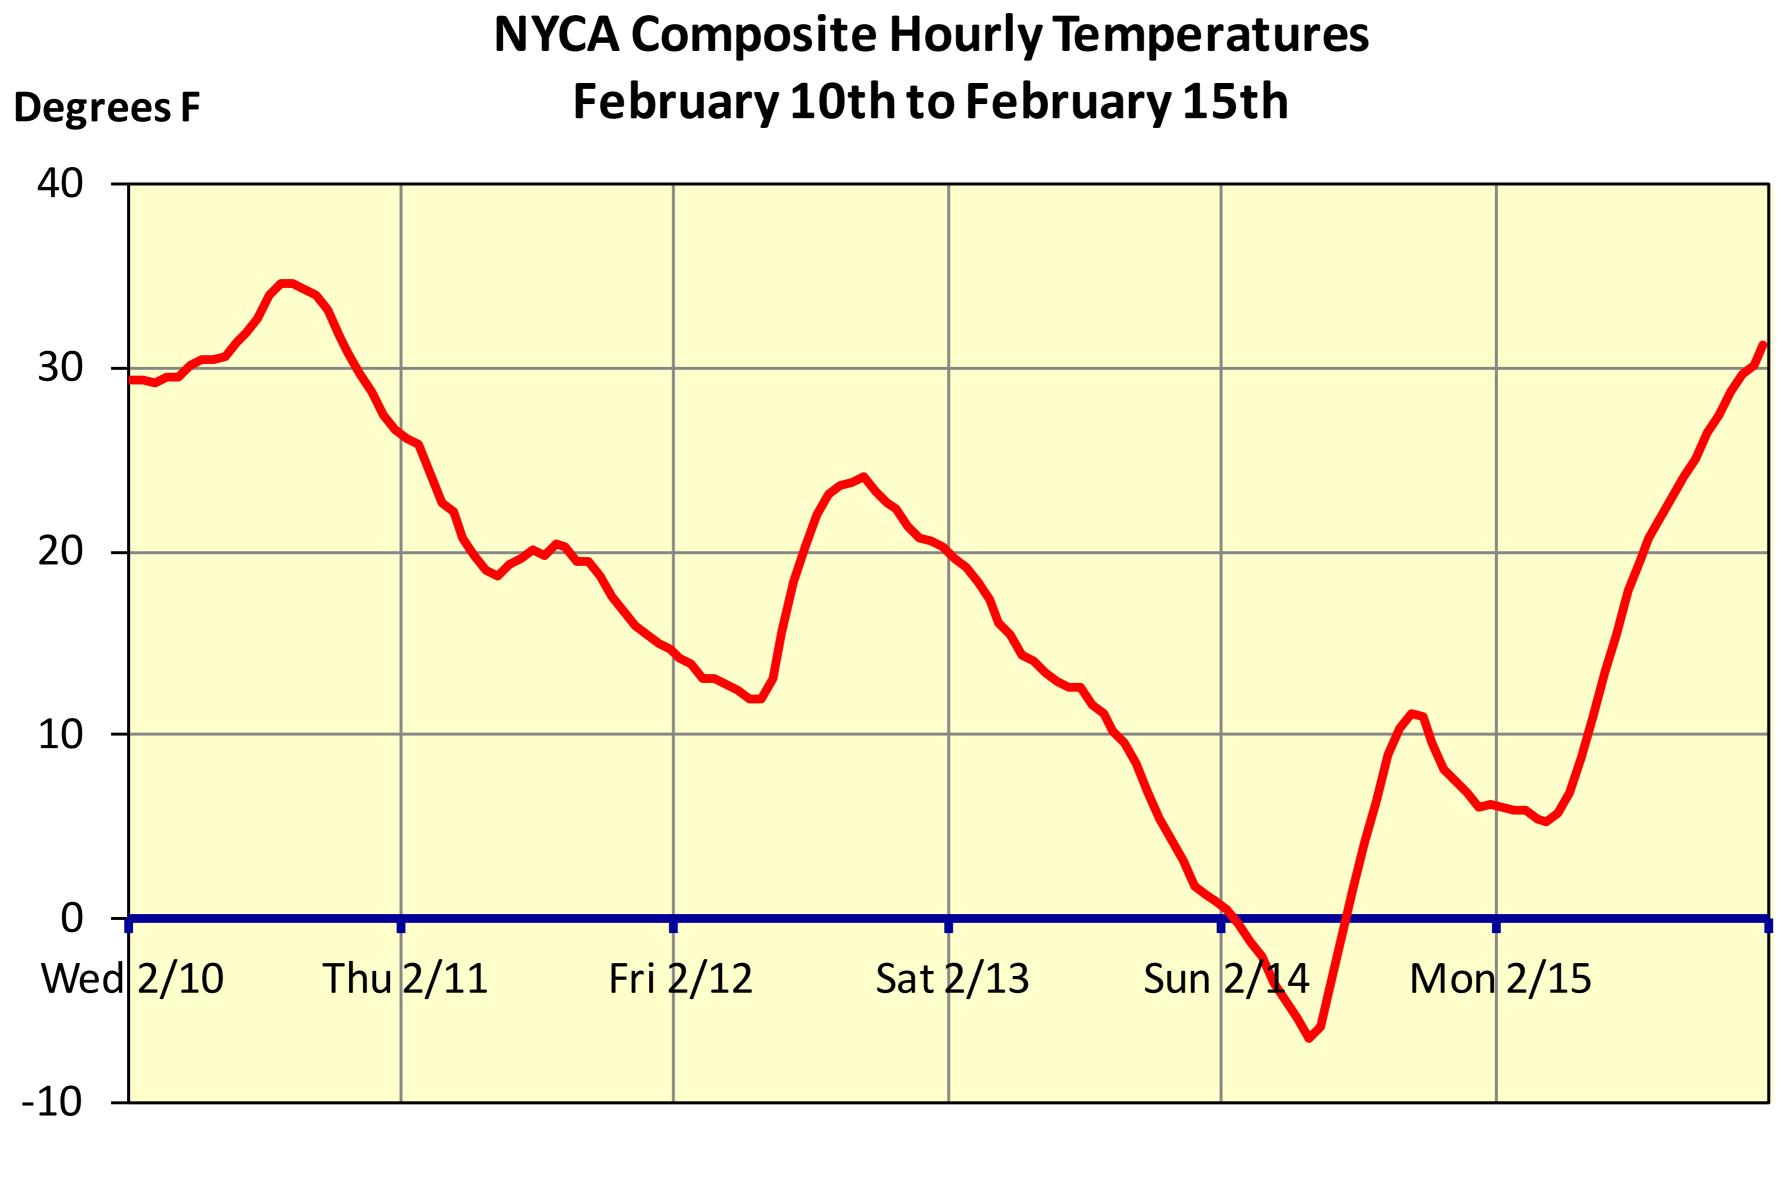

## Winter 2016 Ambient Conditions Record Cold Temperatures since 1975 & Winter 2016 Temperatures

				2016	2016 Minimum Daily Temperatures			
Station	Date Record Was Set, Since 1975	Record Cold Temperature	2016 1/1 to 2/29	1/5/16	1/19/16	2/11/16	2/13/16	2/14/16
Albany	1/27/1994	-23	-13	2	13	8	-8	-13
Buffalo	1/1/1986	-28	-12	7	10	7	-4	-12
Laguardia	1/21/1985	-3	1	14	19	21	8	1
NYCA	2/18/1979	-8	-7	10	15	15	1	-7

(NYCA composite temperature is based on 17 stations across the state)

(NYCA composite temperature is based on 17 stations across the state)

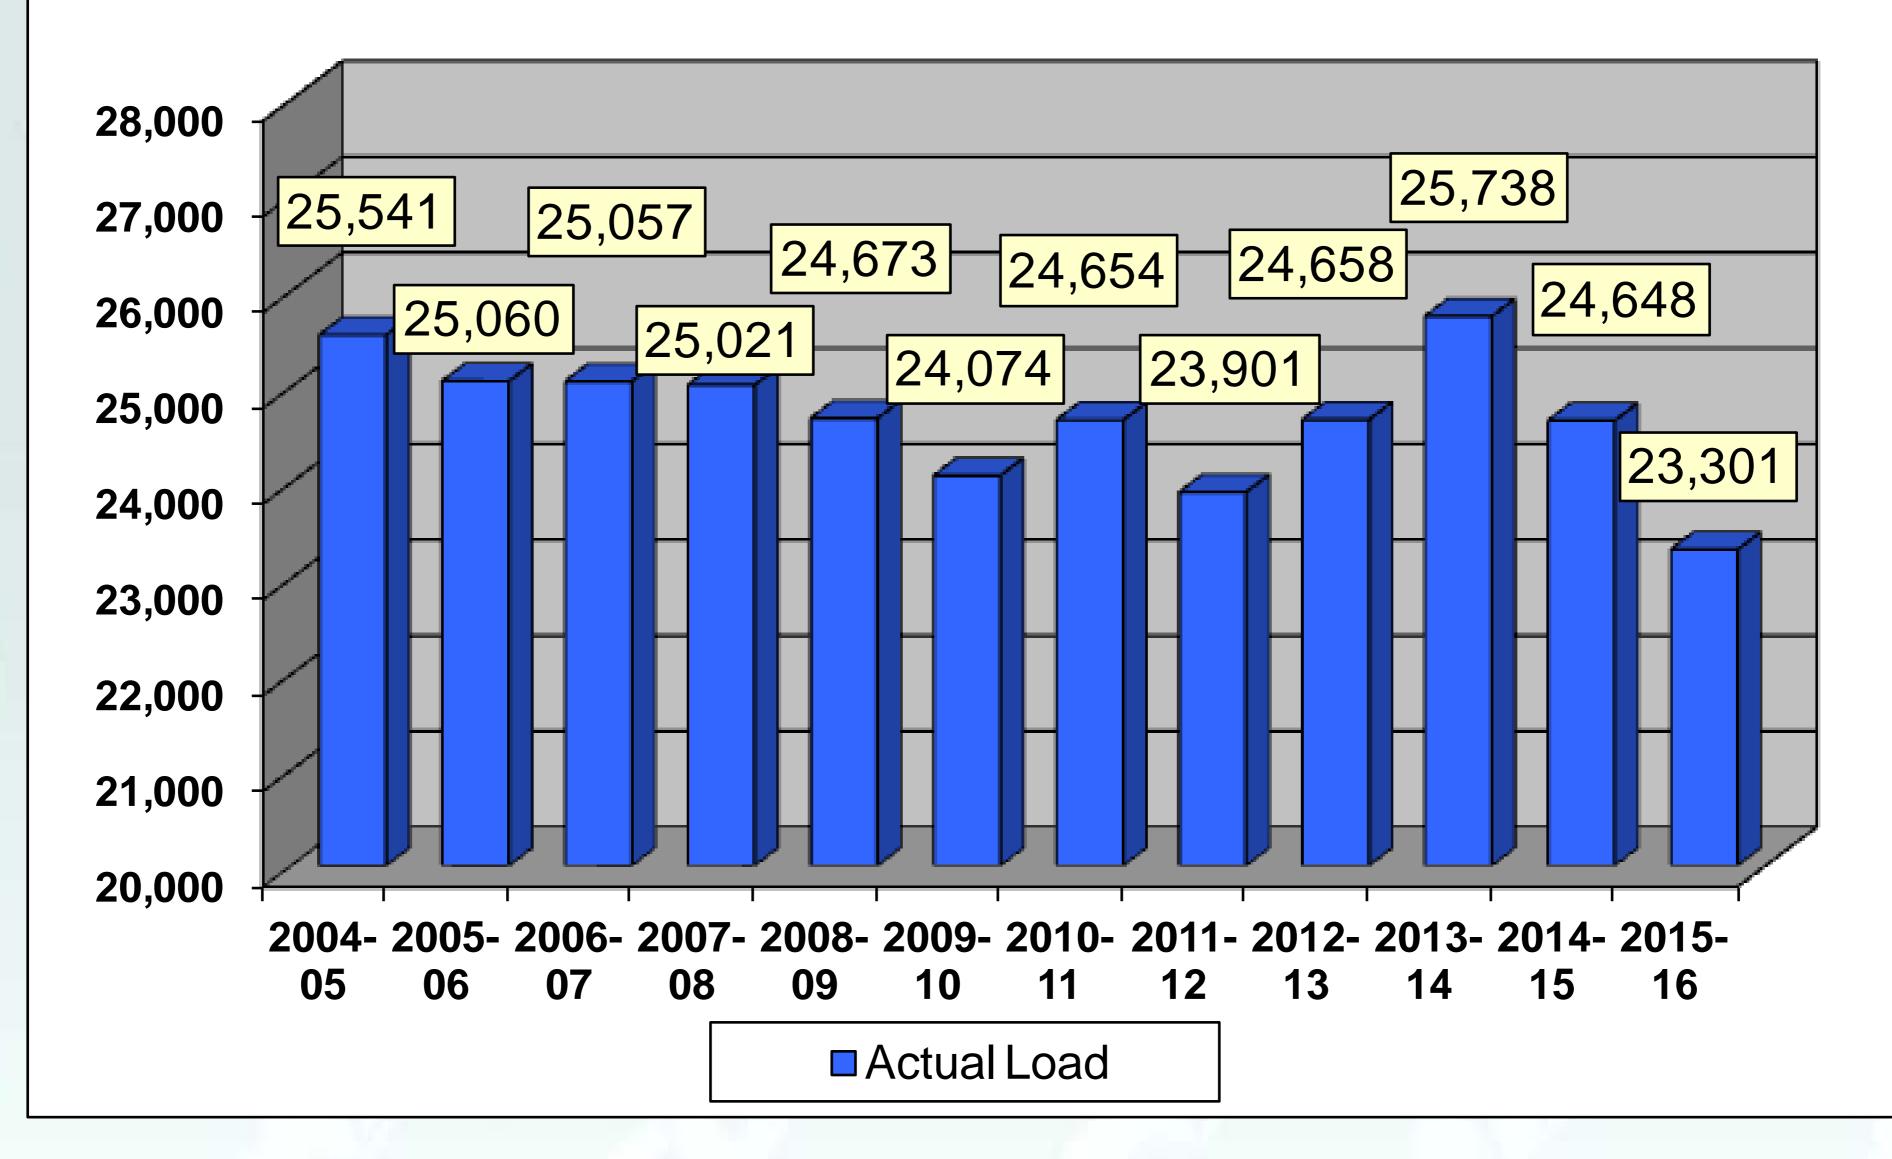

# Winter 2016 Peak Loads

• Three cold weather periods in Winter 2016 January 5th Peak Load -- 23,162 MW January 19th Peak Load -- 23,317 MW (Winter 2016 Peak) February 12-15 Peak Load -- 22,951 MW (Coldest Weather) • Forecast Winter 2016 Peak Load 24,515 MW All-Time NYISO Winter Peak Load • 25,738 MW peak set on January 7, 2014

## Winter Peak Loads - 2004-05 to 2015-16 (MW)

# Winter 2016 **Cold Weather Operations**

**No Statewide Supplemental Capacity Commitments Generation Performance (3 highest peak days)** 

Date	Derates Prior to DAM	Additional Real Time derates	<b>Total Derates</b>	Fuel Related
1/5/2016	1011	528	1539	540
1/19/2016	902	566	1468	46
2/12/2016	1662	233	1895	866
2/13/2016	1765	1152	2917	1682
2/14/2016	1606	422	2028	1010
2/15/2016	1522	338	1860	1010

**Demand Response** No Demand Response Activation was needed this winter **Transmission Performance** Major Emergency (the trip was unrelated to cold weather)

On February 15 the 345 kV Marcy-New Scotland 18 tripped resulting in a

## Winter 2016 **Cold Weather Operations**

### **Fuel Inventories**

- **Regional Electric Conditions** 
  - winters
- **Regional Pipeline Conditions** 
  - Northeast interstate pipelines and LDCs issued only a limited number of Gas Alerts and OFOs this winter
  - New York State set an all-time gas peak on 2/13/2016 (6.6 BCF)
  - Previous peak set on 2/27/15 (6.4 BCF)

Sufficient alternative oil fuel inventories were maintained throughout Winter 2016 The NYISO did not need to initiate the state-agency communication protocol

Fewer generator derates and import schedule curtailments than previous two

The most restrictive were during the February 12-15 time period as there were multiple pipeline OFOs and some gas LDCs either instituted restrictive OFOs or curtailed gas supply to generators

## Winter 2016 Natural Gas Sendout

with 1.23 BCF delivered

 National Grid set an Enterprise-Wide record (New York and New England franchises)

 NYSEG came within 2 degrees of their design day on 2/13

- Central Hudson set a new gas peak day on February 13 with 137,000 MCF delivered
- Con Ed set a new peak day on February 13

## Winter 2016 Cold Weather Wind Performance (1/5, 1/19, 2/12-15)

## The Mission of the New York Independent System Operator, in collaboration with its stakeholders, is to serve the public interest and provide benefit to consumers by:

- Maintaining and enhancing regional reliability ightarrow
- Operating open, fair and competitive wholesale electricity markets
- Planning the power system for the future  $\bullet$
- Providing factual information to policy makers, stakeholders and  $\bullet$ investors in the power system
