DISCUSSION DRAFT NYSRC CORPORATE GOALS --- September 2021 to DECEMBER 2022

Goals		Actions		Responsibility		Progress Target	
Α.	Assure adequate NYCA reliability for high levels	1.	Prepare a scope with NYISO input for a Phase 3 High Intermittent Renewable Resource analysis based on CLCPA 2030 Goals to evaluate the IRM and other	1.	ICS	1.	Present scope to the EC by Dec. 2021
	of renewable resource capacity as mandated		reliability impacts of a future NYCA system.				
		2.	Implement Task A1	2.	ICS	2.	Present Phase 3 report by Dec. 2022
		3.	Consider developing new rules and modifying existing rules recognizing the transition to a greater reliance on renewable resources.	3.	RRS/RAWG	3.	Present PRRs to EC by Dec. 2022
В.	Assure NYCA reliability for extreme weather events and other extreme system	1.	Evaluate the potential need, and develop as appropriate, new resource and transmission rules for planning the system for meeting extreme weather events and other extreme system conditions.	1.	RRS	1.	Present scope to the EC by Dec 2021 and related PRR(s) by Dec. 2022.
	conditions.	2.	Evaluate the potential need, and implement as appropriate, new transmission planning rules for planning the system for meeting certain contingencies now included under Extreme Contingency events.	2.	RRS	2.	Present scope to the EC by Dec 2021 and complete related PRR(s) by Dec. 2022.
		3.	Review the NYSRC Extreme System Condition rules and modify as necessary.	3.	RRS	3.	Present scope to the EC by Oct 2021 and related PRR(s) by July 2022.

C.	Enhance probabilistic models for conducting resource adequacy studies.	1.	Enhance modeling efforts including DER, ELR and other modeling improvements.	1.	ICS	1.	2022 IRM study will include the impacts of increasing DER penetration and ELR modeling improvements.
		2.	Revise the ICS scope to consider emerging issues in IRM studies.	2.	EC/ICS	2.	ICS scope to be completed by December 2021.
		3.	Include LOLH and EUE metrics in IRM and other resource adequacy studies	3.	ICS	3.	LOLH and EUE metrics will be included in the 2022 IRM report and other future studies.
D.	Enhance communication and outreach to state policymakers on	1.	Prepare a white paper to be used as a guide for communicating current reliability issues to policymakers.	1.	EC	1.	Prepare white paper by Dec. 2021.
	reliability issues and challenges.	2.	Initiate outreach to policymakers whenever appropriate.	2.	EC	2.	Provide presentation to the CAC.
E.	Assure best practices are included in NYSRC initiatives.	1.	Review best power system reliability practices at the international, national & regional levels to ensure that NYSRC is aware of current initiatives for possible inclusion in NYSRC Reliability Rules and other initiatives.	1.	All NYSRC committees	1.	Review papers presented at international, NPCC, NERC, FERC & EPRI Probabilistic Analysis and Extreme Weather Forums.
		2.	Monitor ISOs & TOs for lessons learned from procedures, rules, requirements & disturbances.	2.	All NYSRC committees	2.	Monitor ISOs & TOs throughout US.
