Reliability Rule A.2 Narrative (R2)

Sections 5.10 and 5.11.2 of the Market Services Tariff and Section 3.4 of the NYISO Installed Capacity (ICAP) manual require that each LSE procure sufficient Unforced Capacity (UCAP) to meet its Minimum Unforced Capacity requirements each month. In that same section of the ICAP Manual, there is a requirement that LSEs certify to the NYISO the amount of the UCAP they have obtained for the upcoming Obligation Procurement Period. This certification takes place in the ICAP Automated Market application. LSEs that fail to successfully certify sufficient UCAP to meet their minimum UCAP requirement are automatically entered into the Spot Market Auction for the associated Obligation Procurement Period, and the UCAP is purchased on their behalf. Section 5.14.1 of the Market Services Tariff specifies that UCAP purchased in the Spot Market Auction shall be used by the LSE toward all components of its UCAP obligation.

Evidence of compliance with A.2 R2 is contained in the automated market system.
